## Product Description

### Our Vision

Paciolan 7.2 marks the next step in Paciolan's continued effort to provide world class ticketing software. The major features of the release include enhancements to the web-based Pac7 selling platform as well as the on-line consumer facing eVenue product. The Pac7 product now supports additional ticket administration with the addition of the Operator Utilities suite of functionality. The My Account pages within the eVenue platform have been made to be responsive and now support on-line exchanges. Paciolan 7.2 includes a rich set of features enhancement for operators using Pac7 while also improving the overall customer experience with creative and intuitive enhancements to eVenue.

### Product Benefits

#### Pac7

- Pac7 operators can now print tickets, manage seat inventory and view event information via the new Operator Utilities.
- Pac7 selling enhancements including the ability to limit dispositions by control, customized order management emails by business account and much more.

#### eVenue

- Responsive My Account and Payment Processing pages
- New tFund Quick Donate page
- New on-line exchange process.
- Enhancements to existing features like the ability to transfer more than one event at a time, the ability to accept eCheck for general sales transactions, and much more.

- **Pac7 Operator Utilities** – The Paciolan Operator Utilities refers to a suite of features that has been added to the Pac7 product. These features were designed to empower the Pac7 ticket seller to be able to accomplish minor ticket administration within the Pac7 system. Included in the features that make up the Operator Utilities suite of functionality is the ability to view event information such as the number of printed tickets or the number of allocated tickets. Also included in the Operator Utilities is the ability to change or manage seat statuses and the ability to print tickets in bulk.
- **eVenue** – For version 7.2, eVenue receives an updated My Account and Payment Processing pages. Also included in version 7.2 are all new Quick Donate and on-line Exchange pages. All of the new or updated eVenue pages are responsive, or have the ability to adapt to the screen size of any device. Additional enhancements were also incorporated into existing processes such as on-line transfers and on-line ticket reissue.

## Business Reasons

With the introduction of version 7.0 and the release of version 7.1, Paciolan has been evolving their line of legacy products to solutions that take advantage of today's emerging technologies. Version 7.2 is an extension of our vision to continue this transition to a web-based selling platform. The additional features provided in 7.2 will allow our clients the ability to transition their staff over to the new web-selling platform while as the same time improving the user experience for all on-line consumers.

## System requirements

This section describes the system requirements for PC's running Pac7 on version 7.2.

Hardware requirements	
<b>Processor</b>	
Minimum	Intel Pentium Processor G2020 (2.9GHz) or Higher
Recommended	Intel Core i5 or Higher
<b>RAM</b> (Minimum / Recommended)	
x86	2 GB / 4 GB
x64	4 GB / 8 GB
<b>Disk space</b> (Minimum)	
x86	50 GB
x64	50 GB
<b>Video Card</b>	Integrated HD Graphics
Supported Operating Systems / Browsers	
<b>Windows 7</b>	Chrome / IE10 / IE11
<b>Windows 8 – (Excludes Touch Interface)</b>	Chrome / IE10 / IE11
Software Requirements	
<b>Windows 7</b>	Paciolan Software Manager
<b>Windows 8</b>	Paciolan Software Manager

This section describes the system requirements for Mac's running Pac7 on version 7.2.

<b>Hardware requirements</b>	
<b>Processor</b> (Minimum)	2.4 Ghz Intel Core 2 Duo
<b>RAM</b> (Minimum)	2 GB
<b>Disk space</b> (Minimum)	120 GB
<b>Video Card</b> (Minimum)	NVIDIA GeForce 320M 256MB
<b>Supported Operating Systems / Browsers</b>	
<b>Mac OS X v.10.8.4</b>	Safari 7
<b>Software Requirements</b>	
<b>Mac OS X</b>	Paciolan Software Manager (Mac)

## eVenue Browser Requirements

Paciolan's eVenue, version 7.2, supports the current versions of the browsers listed below. Older browsers, non-compatible browsers, or disabling browser features (such as Javascript, cookies and SSL), are not supported.

<b>Supported Browsers - Desktop</b>
Microsoft Internet Explorer
Google Chrome
Mozilla Firefox
Apple Safari

Paciolan's mobile eVenue, version 7.2, supports the default browsers that are found on mobile devices running Google's Android operating system or Apple's iOS.

<b>Supported Browsers - Mobile</b>
Google Chrome
Apple Safari

## Paciolan Virtual Terminal Requirements

This section describes the system requirements for clients running tRes or Pac7 in a virtual terminal configuration for version 7.2.

### Supported Operating Systems

Microsoft Windows Server 2008 R2

## Release Overview

### Release Data Summary

New Version:	7.20.010	Previous Version:	7.01.200
Release Date:	May 22nd, 2015		
Number of Enhancements:	Release 7.2 GA includes 27 primary enhancements.		
Number of Fixes:	Resolved 398 product issues reported in release 7.10.200 or earlier. A detailed list of the Production Support Fixes for this release can be found at the end of this document.		

### Enhancement Summary

The enhancements for tRes, eVenue, and Pac7 in GA Release 7.2 are summarized in the table below. For more information about an enhancement, click its link in the Enhancement column.

#	Enhancement	Impacted Products	Description
1	<a href="#">Quick Donate</a>	tFund, eVenue	Donors can make a donation, provide contact info (name, address, phone) and provide payment info all on one page.
2	<a href="#">Responsive My Account pages</a>	eVenue	The My Account pages are now responsive. All of the My Account functionality will be available to customers using any type of device, including mobile phones or tablets.
3	<a href="#">EPD Registration</a>	tRes, eVenue	Each eVenue site will now have its own set of registration rules and customer attribute defaults.
4	<a href="#">Ticket Transfer – Bulk Transfer</a>	tRes, eVenue	Customers will now be able to transfer more than one event at a time. The ability to transfer more than one event is controlled within the ticket transfer setup.
5	<a href="#">Ticket Transfer – Student to Non-Student</a>	tRes, eVenue	Student accounts that have a student type will now be allowed to transfer their tickets to non-student type accounts. The ability to transfer to non-student account is controlled within the ticket transfer setup.
6	<a href="#">Ticket Transfer – Reminder Email</a>	tRes, eVenue	Customers that have received a ticket transfer invitation email and have not accepted or denied the transfer will receive a transfer reminder email.
7	<a href="#">Ticket Reissue</a>	tRes, eVenue	Customers that purchased tickets on eVenue will now be able to reissue their tickets to a different delivery method than what was initially selected for delivery.
8	<a href="#">Store Multiple Credit Cards</a>	tRes, eVenue	eVenue customers can now store multiple credit cards on their on-line eVenue account.
9	<a href="#">Store eCheck Accounts</a>	tRes, eVenue	In addition to storing multiple credit cards, customers will also be able to store multiple eCheck accounts.
10	<a href="#">eCheck for General Sales</a>	tRes, eVenue	Customers purchasing items on eVenue will now be allowed to pay for their order with eCheck. A minimum threshold amount can be determined by the client.

#	Enhancement	Impacted Products	Description
11	<a href="#">On-Line Exchanges</a>	tRes, eVenue	Customers can now exchange tickets on eVenue. Clients can configure what items can be exchanged out, what items can be exchanged in as well as what type of exchange is allowed (upgrade, same price level, no restrictions).
12	<a href="#">Links to Additional Sites</a>	tRes, eVenue	Clients that would like to add a link to the My Account page that links to a destination of their desire can now do so without having to request custom HTML.
13	<a href="#">Internationalization – address widget</a>	eVenue	When the patron is entering an address on eVenue, the fields and labels change based on the country selected. For example, if country selected = Canada, display "Province", if country selected = US, display "State"
14	<a href="#">Internationalization – improved dual language support</a>	eVenue	Current eVenue supports dual languages using two different distributors and, therefore, two different sites. New eVenue pages support dual language on the same distributor/same site but clients will still need to maintain both distributors for non 7.2 pages.
15	<a href="#">Localization – support for Singapore/Hong Kong clients</a>	Pac7/eVenue	Updates for countries Hong Kong and Macau to support countries that don't use a postal code system and for Singapore which does not need City/Province
16	<a href="#">Event Inquiry</a>	Pac7 – Operator Utilities	Operators can now view the details of an event from within the Pac7 interface. Details include the number of seats sold, allocated, printed, ect.
17	<a href="#">Seat Hold Management</a>	Pac7 – Operator Utilities	Operators can now manage event seat holds from within the Pac7 interface. Key improvements include the ability to change multiple seat statuses into one for multiple events.
18	<a href="#">Counter Seat Hold Management</a>	Pac7 – Operator Utilities	Operators can now manage counter holds from the Pac7 interface.
19	<a href="#">Print Tickets</a>	Pac7 – Operator Utilities	Operators can now perform bulk print runs from within the Pac7 interface. Key improvements include the ability to print event tickets and miscellaneous tickets within the same process.
20	<a href="#">Filter Mark Codes, Dispositions and Bill Plans by Control</a>	Pac7 – Order Management	Pac7 administrators can now select what mark codes, dispositions or bill plans are available within Order Management by Pac7 selling control.
21	<a href="#">Configurable Adjustment Tab</a>	Pac7	Pac7 administrators can now decide whether or not the Adjustment tab is displayed to Pac7 operators.
22	<a href="#">Confirmation Email Setting</a>	Pac7 – Order Management	Pac7 administrators can determine what the default value is for the email confirmation radio buttons present on the Payment page.
23	<a href="#">Default Inquiry Search</a>	Pac7	Pac7 administrators can select which system will be searched when searching for an order.

#	Enhancement	Impacted Products	Description
24	<a href="#">OM Specific Email Template</a>	Pac7 – Order Management	Emails sent for transactions that take place within Order Management can now include templates defined at the business account level.
25	<a href="#">Activity Restrictions</a>	Pac7 – Item Sales	Activity rules that govern the ability of items will now be recognized for operators using Item Sales.
26	<a href="#">Transfer of \$0 charges</a>	PDI – Raiser's Edge Integration	Order lines for seasons listed in TK.EXT.PARAM.E will now be transferred if they have a ticket charge code and a ticket charge amount = \$0. This feature is to support order lines from eVenue that put a charge code in with \$0 charge amount.
27	<a href="#">Identification of Organization Records</a>	PDI – Raiser's Edge Integration	Raiser's Edge Integration users can now distinguish between patrons that are Organizations and Individual. Organization record changes and information will now flow through the integration.

## Enhancement Descriptions

### Quick Donate

#### Impacted Products: tFund, eVenue

#### Business Reasons

Allow Donors a quick and easy way to donate money.

#### Description

The Quick Donate page is a new page on eVenue that allows tFund customers the ability to take donations to a particular drive on-line. The Quick Donate page contains all information needed to process a donation on one page. Donors are not required to login to their account prior to completing a donation. Donations are processed through tFund in the same manner as existing donations. Multiple quick donation pages can be offered at one time and multiple drives can be offered per each Quick Donate page. The setup that defines what is being offered on a Quick Donate page is done within tRes. Changes or additions of new Quick Donate pages do not require a reload. Contact your EOS to obtain the url structure to your specific Quick Donate page.

### Responsive My Account / Payment Pages

#### Impacted Products: eVenue

#### Business Reasons

Responsive web design represents the latest in web development technologies driven by the increase of mobile device usage. The My Account and Payment pages will adjust to the size of the screen the customer is using to view the page.

#### Description

The My Account and Payment page have been revamped using responsive design. Benefits of the new page architecture include:

- **Post Sale Features** – All post sale functions that are launched from the My Account page, such as order history, ticket transfer and ticket return, have also been redesigned to be responsive..
- **Mobile** – The My Account page was previously unavailable on earlier version of the mobile eVenue site. Although a second distributor is still needed to support the mobile eVenue site, the My Account and Payment pages are now shared across both the mobile and desktop platforms, making all My Account functionalities available from any device.
- **No Reloads** – Changes that are made in tRes that effect the My Account page as well as any of the post-sale pages that are launched from the My Account page no longer require a reload. Changes to the Payment page do not require a reload as well. Changes in tRes are data synced to eVenue upon saving the record in tRes.

## EPD Registration

**Impacted Products:** tRes, eVenue

### Business Reasons

eVenue Account Parameters setup can now be defined by distributor record and includes additional personalization flags.

### Description

The EPD Registration Setup screen within tRes has been updated to support preferences by distributor account and allow for additional personalization. Previously customers had to rely on HTML customizations to ensure certain pieces of data were being flagged as required. The new EPD Registration Setup screen allows clients the ability to define whether or not to capture separate billing and shipping addresses, which phone types are required as well as the ability to override the labels that are displayed on eVenue. Although it is required all distributor records have all required fields entered, including distributors used for mobile eVenue, account parameters that are defined for the normal distributor will be applied to new accounts created on mobile.

## Ticket Transfer – Bulk Transfer

**Impacted Products:** tRes, eVenue

### Business Reasons

Customers on eVenue can now transfer more than one event within a single transfer.

### Description

Prior to version 7.2, customers who needed to transfer more than one event at a time were required to proceed through the entire transfer process per event. With the addition of 7.2, a checkbox has been added to the eVenue Ticket Transfer setup screen which, when selected, will allow eVenue customers the ability to transfer more than one event at a time. If more than one event is being transferred, acceptance of the transfer cannot be split up or specific to one or more events being transferred. All time sensitive actions associated with the transfer will be calculated off of the event date and time of the earliest chronological event. Any order charges associated with a transfer will not be impacted by the quantity of events being transferred.

## Ticket Transfer – Student to Non-Student

**Impacted Products:** tRes, eVenue

### Business Reasons

Enable student accounts the ability to transfer to non-student accounts.

### Description

Prior to version 7.2, any customer accounts that had a type that began with the letter "S" would only be allowed to transfer tickets on eVenue to other accounts that had a type that began with "S". With version 7.2, clients can now decide whether or not to allow student account types, or account types that begin with "S", to be able to complete transfers to accounts that are not student accounts, or do not have types that begin with "S". There is a new checkbox present on the Internet Ticket Transfer Setup page that when selected, will allow the transfer of tickets from student accounts to non-student accounts.

## Ticket Transfer – Reminder Email

**Impacted Products:** tRes, eVenue

### Business Reasons

Remind customers who have received an invitation to receive transferred tickets to act upon the transfer request.

### Description

When a customer initiates a ticket transfer on eVenue, an invitation email is sent to the recipient of the ticket transfer. Prior to version 7.2, if the recipient of the ticket transfer invitation did not act upon the transfer request before the defined cutoff time in tRes, the transfer would expire and both parties would be notified. In version 7.2, clients have the ability to define whether or not they want eVenue to send out a reminder email to those individuals who have received a ticket transfer invitation, however have not acted upon it. The parameters required to enable this new feature are located within the ticket transfer setup in tRes and include a field to define the number of hours prior to the event start time the reminder email should be sent as well as what tRes email template should be used when generating the reminder email to the recipient.

## Ticket Reissue

**Impacted Products:** tRes, eVenue,

### Business Reasons

Tickets that are purchased on eVenue can be reissued to a different eVenue delivery method than the delivery method that was used for the original purchase.

### Description

The previous version of eVenue would not allow a customer the ability to reissue his or her tickets to an eVenue delivery method other than the one that had been used for the initial sale of the tickets. In version 7.2, clients can now decide if tickets for a given eVenue Delivery Method can be reissued and if they can, they can specify a list of delivery methods that are acceptable for reissue. Depending on business rules defined by the Client, orders that were initially delivered as PAH could be setup to allow reissues to both PAH and mobile delivery. An additional button has been added to the eVenue Delivery Methods screen that allows Clients the ability to enable reissue for a given delivery method as well as allows Clients that ability to list out any other available reissue delivery methods. No additional fees can be collected as a result of a ticket reissue and it is suggested additional reissue delivery methods be limited to electronic delivery method types.

## Store Multiple Credit Cards

**Impacted Products:** tRes, eVenue

### Business Reasons

Allow eVenue customers that ability to store multiple credit cards.

### Description

Customers using eVenue will now be able to store multiple credit cards to their on-line account. The ability to store multiple credit cards is controlled by the Client and is set by selecting the "Allow Multiple Credit Cards" checkbox that has been added to the Payment Options window within eVenue Selling Parameters setup. When the checkbox is selected, eVenue customers will be able to store multiple credit cards to their eVenue account. When they store the account, they will be given the option to associate a personalized name for the card.

## Store eCheck Accounts

**Impacted Products:** tRes, eVenue

### Business Reasons

Allow eVenue customers that ability to store multiple account routing information for eCheck transactions.

### Description

Customers using eVenue will now be able to store multiple bank account routing information on-line account. The Client must be accepting eCheck payments to be able to offer this feature to their customers. The ability to store multiple bank account routing information is controlled by the Client and is set by selecting the "Store Credit Card/Bank Account Data" checkbox that has been added to the Payment Options window within eVenue Selling Parameters setup. When the checkbox is selected, eVenue customers will be able to store multiple bank accounts to their eVenue account.

## eCheck for General Sales

**Impacted Products:** tRes, eVenue

### Business Reasons

Allow eVenue customers the ability to pay for a normal eVenue transaction with eCheck.

### Description

Prior to version 7.2, the eCheck payment method was only available as a payment method that can be used for processing an eVenue application. Sales that were conducted through general sales or promotional sales would not allow the eCheck payment method as an option the customer could select. In version 7.2 there is a new field on the Payment Options window within eVenue Selling Parameters setup where Clients can now determine the minimum threshold amount in which to offer the eCheck payment method as a payment method. If an eVenue customers total on-line transaction does not exceed the minimum threshold amount listed, the eCheck paymode will not appear as an available payment method.

## On-Line Exchanges

**Impacted Products:** tRes, eVenue

### Business Reasons

Allow eVenue customers the ability to process on-line exchanges through their eVenue account.

### Description

The ability to process an exchange of a ticket had previously been limited to operators using the tRes or Pac7 systems. Prior to version 7.2, eVenue customers did not have an option available that would allow them to process an exchange on-line, unassisted by a ticket representative. With the introduction of version 7.2, Clients can now configure eVenue to allow customers to be able to exchange their tickets. Key benefits of the new on-line exchange functionality include the following:

- **Configurability** – The on-line exchange process is extremely flexible when it comes to determining the rules that govern exchanged out and exchanged in inventory. The ability to process on-line exchanges is limited by item, price level price type as well as by iProfile. Exchange in inventory is determined by item and can be configured to limit exchanges to be within the same price level, allow for upgrades only or have no restrictions.
- **Processing** – Customers can begin the exchange process by navigating to the My Account page within eVenue. Once a customer has begun the exchange process, they will be required to complete the transaction prior to being allowed to process any other transactions on eVenue. On-line exchanges cannot be added to the cart in a similar fashion as some other eVenue processes.
- **Exchange In Item Details** – Events that can be exchanged in during an exchange will be displayed on an event detail page similar to what would be displayed when a customer is normally purchasing a ticket. Common customizations that previously required manual HTML customization, such as hiding the event date, event time or facility information, can now be set at the item details level. This is only specific to the exchange in page.
- **No Reloads** – The on-line exchanges process is part of the new eVenue My Account pages and hence do not require a reload. Changes that are made within tRes will be present on eVenue upon saving the changes in tRes.

## Links to Additional Sites

**Impacted Products:** tRes, eVenue

### Business Reasons

Add links to additional web sites on the My Account page.

### Description

It is common for Clients to request custom links be added to the My Account page of their eVenue site. Additional sites typically include links to the Clients main web site or informational web sites. Prior to version 7.2 the only way to include a link to another site on the My Account page was to have one added via custom HTML. In version 7.2, Clients can now define the link and text that will act as the hyperlink on the Selling Premasters window within eVenue Reserved Seat Ticketing. The links will appear in a box on the My Account page on eVenue.

## Internationalization – Address entry widget

**Impacted Products:** eVenue

### Business Reasons

Update labels and fields for selected country.

### Description

When the patron is entering an address on eVenue, the fields and labels will now change based on the country selected. For example, if country selected = Canada, the label will be displayed as "Province". If the country selected = United States, the label will be displayed as "State". We have localized this address widget for the following: United States, Canada, China, Hong Kong, Indonesia, Macau, Malaysia, Puerto Rico (US), and Singapore. Countries not included in this list will use a generic international address format.

## Internationalization – Improved dual language support

**Impacted Products:** eVenue

### Business Reasons

Single site dual language support for My Account and Payment pages.

### Description

Previous versions of eVenue support dual languages using two different distributors and, therefore, two different eVenue sites. New 7.2 eVenue pages support dual language on the same site making the user experience quicker when moving back and forth between different languages and allowing easier eVenue site customizations. Paciolan has translated all 7.2 pages into French and Spanish. Note that clients will still need to maintain both standard and mobile distributors for non-7.2 pages.

## Localization – Support for countries that do not use postal codes

**Impacted Products:** Pac7, eVenue

### Business Reasons

Support for countries that don't use a postal code.

### Description

Improvements have been made to support both Hong Kong and Macau, countries that do not use a postal code system. Additional improvements have been made for Singapore to better accommodate the Singapore address format which only requires a street address, postal code and country name.

## Event Inquiry

**Impacted Products:** Pac7 – Operator Utilities

### Business Reasons

Provide Pac7 Operators a way to view event related information.

### Description

The Pac7 Event Inquiry is one of 4 pieces of functionality that make up the Operator Utilities suite of functions that has been added to Pac7 in version 7.2. The goal of the Event Inquiry in Pac7 is to allow Pac7 operators the ability to view event information that is typically found on the Event Inquiry page in tRes. Included within this information is the ability to see the number of seats order, allocated and printed. Operators can also view the number of seats on hold by seat status among other pieces of event information. Access to the Pac7 Event Inquiry page is granted by providing a tRes operator the ability to access process TK.EVENT.I.

## Seat Hold Management

**Impacted Products:** Pac7 – Operator Utilities

### Business Reasons

Provide Pac7 Operators the ability to manage and update seat holds.

### Description

The Pac7 Seat Hold Management is one of 4 pieces of functionality that make up the Operator Utilities suite of functions that has been added to Pac7 in version 7.2. The goal of the Seat Hold Management functionality is to allow Pac7 operators the ability to change the seat status for a given event. The HTML5 seat map already present for Pac7 ticket sellers has been leveraged to provide a consistent operator experience. Also included in the Pac7 Seat Hold Management functionality is an updated change level:section process that allows operators the ability to change multiple seat status into a single seat status for multiple events all at one time. Access to the Pac7 Seat Hold Management page is granted by providing a tRes operator the ability to access process TK.HOLD.

## Counter Seat Hold Management

### **Impacted Products:** Pac7 – Operator Utilities

#### **Business Reasons**

Provide Pac7 Operators a way to view and change the seat status for seats on count hold.

#### **Description**

The Pac7 Counter Seat Hold Management is one of 4 pieces of functionality that make up the Operator Utilities suite of functions that has been added to Pac7 in version 7.2. The goal of the Counter Seat Hold Management functionality is to allow Pac7 operators the ability to change the seat status for a given event, including seats that are on the counter hold status. Access to the Pac7 Counter Seat Hold Management page is granted by providing a tRes operator the ability to access process TK.CHOLD.

## Print Tickets

### **Impacted Products:** Pac7 – Operator Utilities

#### **Business Reasons**

Provide Pac7 Operators the ability to print tickets in a bulk print run.

#### **Description**

The Pac7 Print Tickets is one of 4 pieces of functionality that make up the Operator Utilities suite of functions that has been added to Pac7 in version 7.2. The goal of the Print Tickets functionality is to allow Pac7 operators the ability to print tickets within the Pac7 product. Pac7 Operators can now execute print runs in order to print day of event tickets, or simply print off tickets to be distributed through a different channel. The Print Tickets functionality that has been added in Pac7 will print both single event tickets as well as miscellaneous items. Operators will need the Paciolan Software Manager installed in order to use the new Print Tickets function. Access to the Pac7 Print Tickets feature is granted by providing a tRes operator the ability to access process TK.PRINT.F.

## Filter Mark Codes, Dispositions and Bill Plans by Control

**Impacted Products:** tRes, Pac7

### Business Reasons

When an operator selects a mark code, bill plan or disposition in Order Management, all records are displayed in the drop down which make it difficult to locate the intended record.

### Description

When an operator is entering a mark code, bill plan or disposition for an order line within the Pac7 Order Management functionality they are displayed all records that have ever been created within a drop down list. Having all values displayed in this drop down makes it difficult for the operator to easily identify and select their desired record. In version 7.2, Operators can define what mark codes, dispositions and bill plan codes will be displayed in the drop down by defining these values in the Pac7 Selling Control located in tRes. When a Pac7 operator selects a mark code, bill plan or delivery method in Order Management, they will only be displayed the values that have been defined at the Pac7 selling control. If no records are defined within the control, all records will be displayed in the drop down.

## Configurable Adjustment Tab

**Impacted Products:** tRes, Pac7

### Business Reasons

If Order Management is enabled, use of the Adjustment tab becomes trivial and confusing.

### Description

When operators login to Pac7 they are automatically displayed an "Adjustment" tab. This tab can be used to void orders that had been placed within Item Sales. This tab does not access any purchase information that was completed outside of Item Sales. Operators that have Order Management enabled can access any adjust any order regardless where the order originated hence the tab is not needed. Clients can now configure whether or not the Adjustments tab will be displayed by selecting the "Hide Adjustment Tab" checkbox within the Post Sale Options screen in the Pac7 Selling Control.

## Confirmation Email Setting

**Impacted Products:** tRes, Pac7 -Order Management

### Business Reasons

Allow the confirmation email setting default to be one that sends a confirmation email.

### Description

When an operator completes a sale within Order Management, they will have an option to send the customer a receipt of the transaction. There are options on the payment page that govern if the operator would like to send an email confirmation to an email address on file, enter an email address or not send an email at all. The current default setting for all uses is "Do not send email". In version 7.2, Clients can define what the default value is for the confirmation email setting within the Pac7 selling control.

## Default Inquiry Search

**Impacted Products:** tRes, Pac7

### Business Reasons

Control what system will be searched by default on the Inquiry tab.

### Description

Within Pac7, an operator can select the Inquiry tab which will allow an operator the ability to look up order related information. The Inquiry page has the ability to search for orders that have just taken place within the Pac7 Item Sales system or search for orders within all systems. The default system to search is Pac7 Item Sales. In version 7.2, Clients can determine what system will be searched by default on the Inquiry tab by adjusting the drop down setting on the Order Inquiry Options page within the Pac7 Selling Control.

## Order Management Specific Email Template

**Impacted Products:** tRes, Pac7 – Order Management

### Business Reasons

Allow for confirmation emails sent from Order Management to have email templates specific to business account.

### Description

If an operator is conducting sales for multiple data accounts within Pac7, it is desired that the email confirmations that are sent are specific to the business account the operator is selling out of. Prior to version 7.2, only items sold through Pac7 Item Sales could be assigned a different email confirmation by business account. Orders processed through Order Management could not have email confirmations that vary by business account. In version 7.2, Clients can define Order Management specific email templates by business account.

## Activity Restrictions

### **Impacted Products:** tRes, Pac7 – Item Sales

#### **Business Reasons**

Restrictions to limit Operators to items that have a certain Activity types is now enforced in Pac7 Item Sales.

#### **Description**

Operators within tRes can be setup to only be allowed to access inventory that has a certain activity type. Although Activity restrictions are adhered to within Pac7 Order Management, they had not previously been in Item Sales. In version 7.2, Activity restrictions do apply to Operators attempting to view and access within Pac7 Item Sales.

## Transfer of \$0 charges

### **Impacted Products:** PDI – Raiser's Edge Integration

#### **Business Reasons**

Support for \$0 eVenue Order Lines.

#### **Description**

Order lines for seasons listed in TK.EXT.PARAM.E will now be transferred if they have a ticket charge code and a ticket charge amount = \$0. This feature is to support order lines from eVenue that put a charge code in with \$0 charge amount.

## Identification of Organization Records

### **Impacted Products:** PDI – Raiser's Edge Integration

#### **Business Reasons**

Organizational changes added to patron integration.

#### **Description**

Raiser's Edge Integration users can now distinguish between patrons that are Organizations and Individual. Organization record changes and information will now flow through the integration.

## Production Support Fixes

Release 7.2 includes 398 programmatic corrections for CRM, eVenue, Pac7, tFund, tPatron and tRes issues found in version 7.10.200 or earlier, and changes required to support new features/enhancements. CPRs and internal issues are listed along with the affected product. Please contact your Paciolan support representative if you have any questions about the resolved issues in the tables below.

<b>Release 7.20.010 (GA) Certified May 22nd, 2015</b>
